WHO

- All EUROPEA members.
- As usual, one official representative per country, the NC or the person who takes his place, will be registered by free of charge.

WHAT

“WATER EFFICIENCY”

VET of Green Sector in Region of Murcia

OBJETIVES

- To learn about adaptation to the Climate Change
 - How to manage to produce food with scarce water resources
 - How to educate student to be farmers in the climate conditions of XXI century
- To learn about the Green sector in Region of Murcia, a model of production in hard environmental conditions
- Proposals for new E+ projects
- To held the General Assembly. Election of EC members

WHY

- The southeast corner of Spain is probably the driest area all around Europe. And it's expected to be one of the European areas more affected by the climate change.
- **Paradoxically, agro food is, together with tourism, the most important economic sector in this Region.**
- **Consequently we pretend to be a reference in water efficiency to face the challenges of Climate Change.**
- **We would like to show examples of how to manage with water and how, from our VET schools, we contribute to minimize the effects of Climate Change.**
